Classmates:

We are expanding the reunion to include those from the classes surrounding the Class of 69.

We look forward to seeing all of those who can attend the reunion. We have a preliminary agenda which will be sent soon. First there are a couple of “assignments” that we would like all class members complete. They involve some work but will be a terrific memoir for you and your families. **You have two months to complete the following!**

This was originally done by the class of 67. Scott Berry and others have been generous enough to allow us to include examples of their efforts. You will be impressed.

**PLEASE PREPARE THE FOLLOWING.**

- **Ice Breaker** – Stand at dinner and give a one minute, humorous answer to each of these two questions: What was the best part of being an architect? What was the worst?

- **“10/10 – Narrate a 10/10 show.** 10/10 is a presentation format in which participants narrate 10 slides, changing automatically at 10 second intervals. The format keeps the presentations concise, fast-paced and allows several people to present in a relatively short time. There are NO constraints on subject matter, bring a loaded memory stick; projector provided.

- **Graphic Memoir** – Prepare a graphic memoir of your last fifty years.

  We’ll pin them up, one above the other, to create a Graphic Memoir of the Class of ’68 69 and 70. Great fun and very revealing – imagine THOUSANDS OF YEARS of life’s adventures!

  And, the added benefit? You’ll have a graphic memoir for your family archive.

  So, gather up birthdates, family photos, favorite projects, key ideas, profound thoughts, significant influences – whatever illustrates those aspects of your personal and professional life you’d like to share. Spice it up with historic events, like assassinations, recessions, computer drafting and post-modernism.

  You’ve two whole months to prepare this Graphic Memoir. Whether you spend 24 hours or 24 days on it, the result is sure to be terrific.

  A few of our own faculty, current faculty in history and technology, and a few students may drop by. The School will document the event.

Instructions:

Your Graphic Memoir will be 5-1/2” high and about 19’ long. It is created by putting two Japanese Fold Albums* end to end. Each Album has 30 panels, each panel is 3-1/2”x5-1/2;” **each panel represents a year.** Two Albums have 60 panels or six full decades. The first page will be 1960; the last page will be 2019.

*Japanese Albums (small version) by Moleskine: If your art store doesn’t have them, order online from one of two suppliers. The cost varies – about $13 each plus shipping.

http://www.dickblick.com/items/11800-1055/

We’ll use display panels in the Courtyard to assemble the individual strips. The paper in the Moleskin Albums supports both wet and dry media. You can work directly on the panels or prepare materials electronically and paste it on. The more variety, the better.
Class of 67 reunion with Moleskine displays on panels.

8 pages from Scott Berry's Timeline
