architecting anthropoveillance
February 9–April 28, 2019

Guest curator Vahan Misakyan, Cass Gilbert Fellow

Architecting Anthropoveillance

Human life in data-conditioned macro interiors is a life of an entangled subject with the cloudy and ruptured agency, it's a life of an operative link in the megastructure-by-chance, repurposing humans, places, and nature into the larger project of the big data economy. With this presupposition, Architecting Anthropoveillance tells an architectural story about the human condition in the time of big data surveillance and proposes new architectonic concepts that seek to undo the reduction of the world of human being and becoming to its computable properties.

GOLDSTEIN
MUSEUM OF DESIGN
UNIVERSITY OF MINNESOTA
COLLEGE OF DESIGN
